Mengxiang Lin

MSc Graduate

Hong Kong SAR, China

+852 5930 2495 | linmxdaxton@gmail.com | linmengx.github.io

Biography

Mengxiang Lin holds an MSc in Artificial Intelligence from Zhengzhou University and was a Visiting Scholar at the Yangtze Delta Region Institute (Quzhou), University of Electronic Science and Technology of China (UESTC). His research focuses on AI applications in bioinformatics, particularly multi-omics integration, cancer subtyping, and survival prediction. He has published a first-author paper in PLOS Computational Biology.

Education

Master of Science (MSc) in Artificial Intelligence *Zhengzhou, Henan, China*

Zhengzhou University *Sep 2023 to Jun 2026*

Supervisor: Dr. Zhen Tian

Bachelor of Management (BMan) in Information Management and Information Systems *Lanzhou, Gansu, China*

Gansu Agricultural University *Sep 2019 to Aug 2023*

Experience

Visiting Scholar *Quzhou, Zhejiang, China*

Yangtze Delta Region Institute (Quzhou), University of Electronic Science and Technology of China *Aug 2024 to Aug 2026*

In Machine Learning and Bioinformatics Lab supervised by Dr. Quan Zou

Skills

Research Interests	Bioinformatics, Multi-omics, Clustering, Machine learning, Deep learning.
Core Courses	Neural Network & Deep Learning, Artificial Intelligence, Data Mining, Advanced Algorithm Design and Analysis.
Programming Languages	Python, R, Java.
Languages	Mandarin, Cantonese, English (**IELTS 6.5**).

Publications

Journal Papers

- **Lin, M.**, Fan, R., Zhu, S., Yan, X., Zou, Q., and Tian, Z. (2025). Decoupled contrastive multi-view clustering with adaptive false negative elimination for cancer subtyping. *PLOS Computational Biology*, 2025, 21(12): e1013780. (Impact Factor: 3.6, Ranking: MATHEMATICAL & COMPUTATIONAL BIOLOGY 12/67 (Q1), **First author**)

Manuscripts

- **Lin, M.**, Zou, Q., and Tian, Z. AER-Surv: Availability-aware expert routing with residual compensation for cancer survival prediction from incomplete multimodal data.
- **Lin, M.**, Dong, Z., Zou, Q., and Tian, Z. Dual mixture-of-experts with context-aware routing and view weight calibration for cancer subtyping.

Research Projects

Bioinformatics Technologies and Analysis for Multi-omics Cancer Data
NATIONAL KEY PROJECT, National Natural Science Foundation of China (NSFC)
PARTICIPATING MEMBER

- Developing computational frameworks for integrative analysis of multi-omics cancer datasets.
- Achieved superior performance on benchmark cancer datasets over 19 state-of-the-art multi-omics integration methods.

Knowledge Graph-enhanced Cross-view Hierarchical Graph Contrastive Learning
GENERAL PROGRAM, National Natural Science Foundation of China (NSFC)
PARTICIPATING MEMBER

- Assisted manuscript drafting of the method section.
- Assisted in completing partial ablation experiments.

Awards

National Scholarship
Gansu Agricultural University *2020 to 2021*

First-Class Academic Scholarship
Zhengzhou University *2023 to 2024*

Second-Class Academic Scholarship
Zhengzhou University *2024 to 2025*

Second-Class Academic Scholarship
Zhengzhou University *2025 to 2026*
